THUNDER BAY, ON, May 3 /CNW/ - PREMIER GOLD MINES LIMITED (TSX: PG) ('Premier') is pleased to announce that it has entered into a definitive acquisition agreement with arm's length third parties pursuant to which Premier has agreed to indirectly acquire the Blue Sage mineral claim rights within the Rain Sub-district of the Carlin Trend, in Elko County, Nevada. The transaction will result in the expansion of Premier's mineral interests along the 'Rain Fault' strike extension.

The Blue Sage claims are located to the northwest of and adjoin the Sections that comprise Premier's Saddle Gold Project, covering approximately 4500 feet (1.37 kilometres) of the projected 'Rain Fault' strike extension. The Rain Fault is host to the past producing Rain Gold Mine, and the Saddle/NW Tess Gold Deposit (Premier holds a 100% interest in the majority of the Saddle Deposit). The Saddle Gold Deposit is one of several deposits discovered by Newmont Mining Corporation during the 1990's to the northwest of, and down plunge from, its Rain Gold Mine. Recent drilling by Premier at Saddle has returned significant gold intersections including 0.25 ounce per ton gold (oz/t Au) across 40.0 feet (8.46 grams per tonne gold (g/t Au) across 12.2 metres) including 0.31 oz/t Au across 22.9 feet (10.70 g/t Au across 6.98 m). Ongoing drilling continues to intersect favourable structures and mineralization.

The Nevada acquisitions represent a new chapter in Premier's strategy to build a significant presence in proven, accessible and low-risk jurisdictions that offer opportunities for the discovery of potentially high grade gold deposits.

'The acquisitions of Saddle and Blue Sage represents our ongoing commitment to expand our US-based presence, particularly on the Carlin Trend, one of the world's most productive gold districts,' commented Ewan Downie, President and CEO of Premier Gold Mines Ltd. .

The acquisition of the Blue Sage mineral claims includes the assumption by Premier of a US\$400,000 promissory note. The purchase price for the acquisition will be satisfied by the issue of an aggregate of 350,000 common shares of Premier. The Blue Sage mineral claim rights are subject to a one percent (1.0%) net smelter return royalty. The

transaction is subject to conditions normal for a transaction of its nature, including the approval of the Toronto Stock Exchange.
