

# Matamec Announces Upcoming Participation at Asian Conferences

30.10.2013 | [Marketwired](#)

MONTREAL, QUEBEC--(Marketwired - Oct 30, 2013) - **Matamec Explorations Inc.** ("Matamec" or the "Company") (TSX VENTURE:MAT)(OTCQX:MHREF) is pleased to announce its participation at upcoming conferences throughout the month of November in Asia.

## China Mining 2013

Mr. Andre Gauthier, President and CEO, will be attending the 15th China Mining Conference and Exhibition 2013 at the Tianjin Meijiang Convention and Exhibition Center on November 2-5, 2013.

## Canada Mineral Forum

On November 7, 2013 at 10:50 a.m. in The Great Hall of The St. Regis, Beijing, China, Mr. Gauthier, has been invited by the Canadian Embassy and Invest-Quebec ("Investissement Québec") to make a corporate presentation at Canada Mineral Forum.

## 9<sup>th</sup> International Rare Earth Conference

Matamec will be attending the 9<sup>th</sup> International Rare Earth Conference in Hong Kong, China, on November 12 to 14, 2013. Mr. Gauthier will make a corporate presentation on November 13<sup>th</sup> at 4:00 p.m. The conference will take place at the Shangri-La Hotel, Hong Kong. Mr. Michael Roche, Director of Marketing, Rare Earths and Speciality Metals and Mr. Edward Miller, Director of Investor Relations will be in attendance.

## Tokyo Investment Mining Seminar

The Canadian Trade Commissioner has invited Matamec to participate in the upcoming Tokyo Investment Mining Seminar in Japan on November 14, 2013. Mr. Gauthier will make a corporate presentation at the Canadian Embassy in Tokyo.

## About Matamec

Matamec Explorations Inc. is a junior mining exploration company whose main focus is in developing the Kipawa HREE deposit with TRECan.

In parallel, the Company is exploring more than 35 km of strike length in the Kipawa Alkalic Complex for rare earths-yttrium-zirconium-niobium-tantalum mineralization on its Zeus property. Since 2008, Matamec discovered many potential showings. Particularly, it drilled the PB-PS Zone in the fall of 2012 and identified similar Eudialyte-Mosandrite/Yttrio-Tantalite/Britholite associated mineralization founded at the HREE Kipawa Deposit. This type of mineralization is presently known over 200 metres long and it opens laterally and at depth. The Company plans to drill these extensions later this year.

The Company is also exploring for gold, base metals and platinum group metals. Its gold portfolio includes the Matheson JV property located along strike and in close proximity to the Hoyle Pond Mine in the prolific gold mining camp of Timmins, Ontario. In Quebec, the Company is exploring for lithium and tantalum on its Tansim property and for precious and base metals on its Valmont and Vulcain properties. Matamec signed in August 2013 an option agreement where Canada Strategic Metals can acquire an interest of up to 50% in

the Sakami gold project, located in the James Bay region of northern Quebec by committing \$2.25 million in exploration work including \$500,000 in the first year on drilling.
