

Dunnedin Adds Tom Mccandless, Ph.D. As Technical Advisor

29.01.2015 | [The Newswire](#)

January 29, 2015 / TheNewswire / Vancouver, BC, Canada. - [Dunnedin Ventures Inc.](#) (the "Company" or "Dunnedin") (TSX-V: DVI) is pleased to announce that Tom McCandless, Ph.D., has joined the Company as a Technical Advisor.

Dr. McCandless is President of MCC Geoscience Inc. and has over 35 years of diamond-specific industry experience including Chief Mineralogist with Stornoway Diamonds Corporation, Ashton Mining of Canada and Superior Minerals. He was directly involved with the early stage discovery and assessment of the Renard kimberlites, and worked with the early diamond results from the Kahuna project. Dr. McCandless has consulted on diamond projects in Africa, Europe and the Americas, has published extensively on diamonds and is presently an adjunct professor at the University of Alberta and University of Arizona.

For further information please contact Mr. Chris Taylor, M.Sc., P.Geo, CEO at 604 681 0084, or Mr. Allan Barry Laboucan, Special Advisor at 604 505 4753.

On behalf of the Board of Directors

[Dunnedin Ventures Inc.](#)

Chris Taylor

Chief Executive Officer

About the Kahuna Project

Kahuna is an advanced stage high grade diamond project located near Rankin Inlet, Nunavut. Three main diamondiferous kimberlite dikes have been drilled and bulk sampled and returned grades of 0.85 to 2.18 carats per tonne, the Kahuna, PST and Notch. An Inferred Resource released by Dunnedin showed over 4 million carats of macrodiamonds (+0.85 mm) at a grade of 1.01 carats per tonne had been defined along the partial strike length of the Kahuna and Notch kimberlites through shallow drilling. The largest diamond recovered was a 5.43 carat stone from the Kahuna dike that had been broken during the sample preparation process and was reconstructed as having an original size of 13.42 carats. The dikes have comparable strike lengths, widths and grades to producing diamond mines and occur within a broad network of largely untested geophysical targets, overlain by dense diamond indicator mineral trains.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Statements included in this announcement, including statements concerning our plans, intentions and expectations, which are not historical in nature are intended to be, and are hereby identified as, "forward-looking statements". Forward-looking statements may be identified by words including "anticipates", "believes", "intends", "estimates", "expects" and similar expressions. The Company cautions readers that forward-looking statements, including without limitation those relating to the Company's future operations and business prospects, are subject to certain risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements.
