Quarterly Royalty Payments

Callinan received interim quarterly royalty payments totaling \$1,453,953 from HudBay for the quarter ended December 31, 2014, which will be the last quarter of payments under the 6?% Net Profits Interest Royalty ("NPI") structure. These royalty payments include \$1,371,779 from the 6?% NPI and \$82,174 from the production royalty of \$0.25 per short ton of ore milled. Interim quarterly royalty payments were \$2,325,043 for the same quarter last year. The reduction is due mainly to the two week unplanned maintenance shutdown at the 777 Mine, as reported by HudBay on February 19 this year. The unplanned shutdown impacted production, as did the mining of significantly lower zinc grades with lower experienced recoveries. The higher unit operating costs relate to underground mining and should not affect future payments under the future 4% Net Smelter Return ("NSR") structure.

The NPI payment represents 75% of an estimate by HudBay. The remaining 25% is paid annually, in mid-July, 130 business days after HudBay's financial year end.
