Subject to the conditions described below, Paramount stockholders of record at the close of business on April 14, 2015 will be entitled receive one share of common stock of SpinCo for every twenty shares of Paramount common stock held by such stockholder, payable upon the closing of the previously announced merger (the "merger") of Paramount with and into a subsidiary of [Coeur Mining Inc.](#) ("Coeur") (NYSE:CDE). No fractional shares of common stock of SpinCo will be distributed. If Paramount stockholders or Coeur stockholders do not approve the acquisition proposal or if the other conditions to the acquisition are not expected to be satisfied or waived, Paramount will not be required to complete the distribution.

About Paramount

[Paramount](#) is a U.S.-based exploration and development company with multi-million ounce advanced stage precious metals projects in northern Mexico (San Miguel) and Nevada (Sleeper).

The San Miguel Project consists of over 100,000 hectares (over 247,000 acres) in the Palmarejo District of northwest Mexico, making Paramount the largest claim holder in this rapidly growing precious metals mining camp. The San Miguel Project is ideally situated near established, low cost production where the infrastructure already exists for early, cost-effective exploitation. The San Miguel Project does not contain any known reserves and any planned drilling program is exploratory in nature.

The Sleeper Gold Project is located off a main highway about 25 miles from the town of Winnemucca. In 2010, Paramount acquired a 100% interest in the project including the original Sleeper high-grade open pit mine operated by Amax Gold from 1986 to 1996 as well as staked and purchased lands now totaling 2,570 claims and covering about 47,500 acres stretch south down trend to Newmont's Sandman project. This acquisition is consistent with the Company's strategy of district-scale exploration near infrastructure in established mining camps. The Sleeper Gold Project does not contain any known reserves and any planned

drilling program is exploratory in nature.
