Commenting on this announcement, Varshan Gokool, CFO of Euromax said:

"The signing of these Mandate Letters in combination with the UFK Support is a significant milestone in our financing plan and shows strong debt appetite for the Ilovitza project. These combined with the Royal Gold Agreement provide for USD 400 million of the funding towards the construction of Ilovitza. By mandating the banks early in the process, we will be able to run the due diligence process in parallel with the DFS/FEED so as to avoid any delays on receipt of the construction permit in 2016. With the envisaged support of the UFK, we have been able to achieve significant tenor of up to 12 years for the repayment of the loan, so our shareholders get the benefit of the increased gearing and maximises the Project's IRR."
