

TORONTO, ONTARIO--(Marketwired - Jun 22, 2015) - [Metals Creek Resources Corp.](#) (TSX VENTURE:MEK) (the "Company") is pleased to announce the commencement of a 3 hole diamond drill program on the Ogden Property in the Timmins Gold Camp, Ontario. The Ogden claims cover eight kilometers of strike length of the Porcupine-Destor Break between Goldcorp's Dome Mine and Lake Shore Gold's West Timmins Mine. The Ogden Property is held under a joint venture in which Metals Creek owns 50%, and Goldcorp Canada Ltd. ("Goldcorp") owns 50% (as manager and on behalf of the Porcupine Joint Venture, a joint venture between [Goldcorp Inc.](#) and Goldcorp Canada Ltd.) with MEK being the operator of the project.

This new drilling program will focus on near surface mineralization as well as further defining a potential second parallel zone of mineralization within the Naybob South Zone. Previous drill campaigns carried out over the past several years have partially defined shallow gold mineralization.

Highlights from Previous drilling include,:

Diamond Drill Hole (DDH) OG10-025 returning an intercept of 5.68 grammes per tonne (g/t) gold over 7.0 meters(m),

DDH OG11-01 assaying 6.217 g/t gold over 6.63m and,

DDH OG10-023 assaying 22.5m of 1.03 g/t gold.

The zone is described as a strongly altered sedimentary unit with strong albitization and silicification with associated pyrite and arsenopyrite. Results from the drill program will be released as they are received and compiled.

Michael MacIsaac, P.Geo and VP Exploration for the Corporation and a qualified person as defined in National Instrument 43-101, is responsible for this release, and supervised the preparation of the information forming the basis for this release.

About Metals Creek Resources Corp.

[Metals Creek Resources Corp.](#) is a junior exploration company incorporated under the laws of the Province of Ontario, is a reporting issuer in Alberta, British Columbia and Ontario, and has its common shares listed for trading on the Exchange under the symbol "MEK". Metals Creek has earned a 50% interest in the Ogden Gold Property, including the former Naybob Gold mine, located 6 km south of Timmins, Ontario and has a 8 km strike length of the prolific Porcupine-Destor Fault (P-DF) that stretches between Timmins, Ontario and Val d'Or, Quebec. The Company has also recently entered into a JV with Benton Resources on Metals Creeks Staghorn Gold Project in Newfoundland. Metals Creek has also recently made a new gold/silver discovery in the "White Gold District" on the Squid East project in the Yukon and is also engaged in the identification, acquisition, exploration and development of other mineral resource properties, and presently has mining interests in Ontario, Yukon and Newfoundland and Labrador. Additional information concerning the Corporation is contained in documents filed by the Corporation with securities regulators, available under its profile at www.sedar.com.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
