

Vancouver, BC / TheNewswire / July 9 2015 - [Doubleview Capital Corp.](#) ("Doubleview") (TSX-V: DBV) is reviewing all of its options after a Tahltan blockade has temporarily interrupted drilling operations at the Hat gold-rich copper porphyry discovery in northwest British Columbia's Sheslay district.

Farshad Shirvani, Doubleview President and CEO, commented: "Doubleview was issued a five-year exploration and drilling permit by the Ministry of Mines and Energy after meeting the requirements for consultation with First Nations.

"We have dealt respectfully with the Tahltan Nation ever since we commenced first-ever drilling at the Hat in 2013. Exploration in this district has been carried out for more than half a century and Tahltan Drilling Services has been contracted for all of Doubleview's drilling to date.

"Our aim is to resume drilling as quickly as possible and prove up a world class deposit for our shareholders. We are consulting with our legal counsel to determine the best steps to take to allow drilling to resume.

"We greatly appreciate the understanding and support of our shareholders. We will provide further updates as soon as possible," Shirvani concluded.

The Tahltan blockade started late yesterday while hole H-25 was in a zone of gold-copper porphyry mineralization at a depth of 270 meters. Holes H-24 and H-25 were collared approximately 1 km northwest of the Lisle Discovery Zone.
