

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Dec 22, 2015) - [Mesa Exploration Corp.](#) (TSX VENTURE:MSA)(OTC PINK:MSAJF) is pleased to announce that it has re-acquired, by staking, the Green Energy mineral brine project in Utah. The project consists of mining claims covering an area of 80 acres and is 100% wholly-owned.

Brine was discovered in the 1960s when oil exploration wells encountered blow-outs drilling into Bed #31 of the Paradox Formation. The pressurized free-flowing brine interrupted drilling operations and was considered a nuisance, rarely chemically analyzed or flow-rate tested. Four oil exploration wells have been drilled on the project; the analytical data for these wells were described in a 43-101 report which is being updated to reflect the current claim configuration.

#### About Mesa Exploration

Mesa is exploring a portfolio potash, gold and silver mineral properties in the United States where it controls significant land holdings in proven mining districts with excellent access and infrastructure. Mesa currently has 16.7 million shares issued and outstanding, 50% of the shares are controlled by insiders and institutions. ON BEHALF OF THE BOARD

MESA EXPLORATION CORP.

Foster Wilson, President and CEO

*This news release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, including the likelihood of commercial mining and possible future financings are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include unsuccessful exploration results, changes in metals prices, changes in the availability of funding for mineral exploration, unanticipated changes in key management personnel and general economic conditions. Mining is an inherently risky business. Accordingly the actual events may differ materially from those projected in the forward-looking statements. For more information on the Company and the risks and challenges of its business, investors should review the Company's annual filings that are available at [www.sedar.com](http://www.sedar.com).*

The TSX Venture Exchange has neither approved nor disapproved of the contents of this news release.
