

VANCOUVER, BC--(Marketwired - April 25, 2016) - [Comstock Metals Ltd.](#) (TSX VENTURE: CSL) ("CSL" or the "Company") is pleased to announce that Dr. David A. Terry has joined the Company as President and CEO and Director, effective today.

Dr. Terry is a professional economic geologist, senior executive and corporate director with more than 25 years' of international experience in the mineral resources sector. He has played key roles in the successful acquisition, exploration and development of a number of precious and base metal deposits, primarily in North and South America, and has expertise in advanced project evaluation, M&A, corporate finance, and design and execution of effective exploration programs.

In the course of his career Dr. Terry has held executive positions and directorships with a number of publicly-listed and private mineral resource companies; he currently serves as a director of [Golden Arrow Resources Corp.](#) which is advancing its Chinchillas silver project in Argentina. He has also worked with a number of senior mining companies including Boliden Limited, Westmin Resources Limited, Hemlo Gold Mines Inc., Com[Inco Ltd.](#) and Gold Fields Mining Corporation.

Dr. Terry holds a B.Sc. and Ph.D. in geology from Western University in Ontario and is a member of the Association of Professional Engineers and Geoscientists of British Columbia.

Douglas Turnbull, P.Geo., a Qualified Professional as defined by National Instrument 43-101 has reviewed and approved the scientific and technical disclosure in this press release.

About Comstock Metals Ltd.

[Comstock Metals Ltd.](#) is a mineral exploration company. Its flagship 16,335 hectare QV Property is located in the White Gold district of the Yukon Territory, approximately 70 kilometres south of Dawson City. To date, the Company has completed 3,400 metres of drilling in 17 drill holes which formed the basis for a maiden Inferred mineral resource totalling 4.4 million tonnes grading 1.65 g/t Au containing 230,000 ounces of gold at a 0.5 g/t Au cut-off (See July 8, 2014 News Release). The VG Deposit remains open in all directions and is proximal to other untested sub-parallel structures. The VG Zone has similar geology and style of mineralization to Kinross's Golden Saddle deposit, located 11 kilometres to the south. Additional promising targets exist on the QV Project, with potential for the discovery of significant intrusion related and/or orogenic gold mineralization.

Comstock also owns early stage uranium claims in the Patterson Lake area of Saskatchewan.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this Release.
