

Far Resources Expands Drill Program and Awaits Rock Chip Assays from its Expanded Zoro1 Lithium Property, Snow Lake

19.07.2016 | [ACCESS Newswire](#)

VANCOUVER, July 19, 2016 - [Far Resources Limited](#) (CSE: FAT) (FSE: F0R) ("Far Resources" or the "Company") is pleased to announce that it is planning to expand its drilling to include a drill program on its newly acquired lithium-bearing pegmatite dykes on properties adjacent to its Zoro1 claim in Snow Lake, Manitoba, acquired pursuant to the letter of understanding with Strider Resources Limited ("Strider Resources") as described in its news release dated July 5, 2016.

Far Resources is planning a program of approximately 1200 metres to confirm some of the historic drill intercepts on the Zoro1 claim as well as testing selected targets on the adjacent Jake claims recently acquired from Strider Resources. The targets in all cases are spodumene-bearing pegmatite dykes.

Representative rock chip samples recently collected by the Company's consultants from historic trenches exposing these dykes are being analysed by Activation Laboratories of Ancaster, Ontario, an ISO-Certified laboratory. These results will assist in selecting targets and planning the drill program. These assays will be presented in a subsequent news release.

The scientific and technical information regarding Far Resources' lithium claims contained in this news release has been approved by Mark Fedikow, P.Geo., a consultant of Far Resources and a "qualified person" as defined in NI 43-101.

Frankfurt Stock Exchange Symbol

The Company also wishes to announce that it has been accepted and is now open for trading on the Frankfurt Stock Exchange. The Company will trade under the symbol F0R (F Zero R) and its identifying number, or WKN, is A2AH8W.

About the Company
