About Bullfrog Gold Corp.

The Company is focused on the further exploration and development of its flagship Bullfrog Gold Project (Project) located 120 miles NW of Las Vegas, Nevada. The Company controls 2,200 acres where Barrick Bullfrog Inc. (Barrick) produced 2.3 million ounces of gold during 1989 into 1999. The Company has access to Barrick's large data base, including 157 miles of drilling in 1,298 holes, heap leach test work and much additional data that support the Project. In this regard, it would cost much more than \$40 million to re-create this very large data base.

Based on the Barrick information, the Company has internally estimated that 470,000 ounces of gold mineralization averaging 0.89 g/tonne remain around Barrick's mines, and that this mineralization is amenable to open pit mining and low cost heap leach processing. In addition, the Project has excellent, existing infrastructure and the Company's surrounding lands have strong exploration potential.

Cautionary Note Regarding Forward Looking Statements

This press release may contain certain "Forward-Looking Statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the United States Securities Exchange Act of 1934, as amended. All statements, other than statements of historical fact, included herein including those with respect to the objectives, plans and strategies of the Company and those preceded by or that include the words "believes," "expects," "given," "targets," "intends," "anticipates," "plans," "projects," "forecasts" or similar expressions, are forward-looking statements that involve various risks and uncertainties. We use certain terms in this valuation such as "mineralization" and "mineral inventory estimates" that are not defined in Canadian National Instrument 43-101; or recognized under the U.S. SEC Industry Guide 7. The Company is presently an exploration stage company. Exploration is highly speculative in nature, involves many risks, requires substantial expenditures and may not result in the discovery of sufficient mineral deposits that can be mined profitably. Furthermore, the Company currently has no resources or reserves on any of its properties. As a result, there can be no assurance that such forward-looking

statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Additional information regarding important factors that could cause actual results to differ materially from the Company's expectations is disclosed in the Company's documents filed from time to time with the United States Securities & Exchange Commission.
