

TORONTO, ON--(Marketwired - January 09, 2017) - [Marathon Gold Corp.](#) ("Marathon" or the "Company") (TSX: MOZ) is pleased to announce continued success in intersecting high-grade gold in deeper drilling at the Marathon Deposit, Valentine Lake Gold Camp. New drilling has intersected very wide intervals of high-grade gold at depth including 3.01 g/t Au (uncut) over 47.0 meters in extended MA-15-109, 2.60 g/t Au over 44.0 meters in MA-16-150, 3.33 g/t Au over 13.0 meters in MA-16-152 and 3.87 g/t Au over 9.0 meters in MA-16-151. The deeper mineralized zone of the Marathon Deposit has a strike length in excess of 400 meters (Figure 1). The sub-vertical mineralized corridor of the Marathon Deposit is 50-100 meters wide (TT), is open along strike, and extends in excess of 350 meters to depth. Shallow drilling in the central part of the Marathon Deposit also hit high grade, near surface mineralization with 15.78 g/t (uncut) over 5.0 meters including 31.57 g/t Au (uncut) over 2.0 meters in MA-16-150.

The exploration crew has mobilized at the Valentine Lake Gold Camp and drilling is underway with two drill rigs, one at the Marathon Deposit and one at the Leprechaun Deposit. In light of very encouraging preliminary analysis of drill results from the Marathon Deposit since the last resource in June 2015, Marathon has decided to proceed with a third-party resource update of the Marathon Deposit earlier than originally anticipated. The updated resource is expected to be completed by the end of February 2017. Results from the new resource estimate will be used to optimize further drilling and to advance the development plan for the Valentine Lake Gold Camp.

Highlights:

- Best intercepts 200 meters or more below surface included 3.01 g/t Au (uncut) over 47.0 meters with 14.39 g/t Au over 3.0 meters and 11.74 g/t Au (uncut) over 5.0 meters in extended MA-15-109; 3.33 g/t Au over 13.0 meters with 32.26 g/t Au over 1.0 meter and 8.55 g/t Au (uncut) over 8.0 meters with 15.05 g/t Au over 1.0 meter and 16.0 g/t Au (uncut) over 3.0 meters in MA-16-152; 3.87 g/t Au over 9.0 meters with 11.14 g/t Au over 3.0 meters and 2.19 g/t Au over 13.0 meters, and 3.82 g/t Au over 5.0 meters with 8.76 g/t Au over 1.0 meter in MA-16-151; and 2.60 g/t Au over 44.0 meters with 15.8 g/t Au over 2.0 meters and 16.35 g/t Au over 2.0 meters and 3.58 g/t Au over 6.0 meters in MA-16-150.
- These new deep high-grade gold intercepts occur between 100 - 150 meters down-dip from previous drilling and demonstrate the continuity and strength of the mineralization. The deeper higher-grade mineralized zone, intersected in previously released drill holes MA-16-101, 107, 111, 112, 113, 116, 127, 128, 130, 136, 149 and MA-15-047 and 032, now has a strike length in excess of 400 meters (Figure 1).
- High grade, near surface gold mineralization in MA-16-150 returned 15.78 g/t Au (uncut) over 5.0 meters with 31.57 g/t Au (uncut) over 2.0 meters as well as 2.38 g/t Au over 3.0 meters and 1.54 g/t Au over 6.0 meters.
- The 50-100 meter-wide (TT) and sub-vertical Marathon Deposit alteration and mineralized corridor, including the 2015 open pit resource shell, extends along strike for at least 1.7 kilometers (Figure 1). Much of this 1.7 km strike length has been drill-tested with only wide spaced holes and therefore requires additional drilling before being included into a resource update. The current 2015 resource included just 500 meters of the total 1.7 km strike length and the new resource will expand beyond the 500 meters strike length to incorporate the recent very positive results from drilling to the southwest.

"The drilling along strike and down dip in the current Marathon Deposit resource area has yielded very encouraging results with the recent drilling below 100 meters of surface returning exciting wide intervals of high-grade gold. Gold grades appear to overall be increasing with depth. These new deeper as well as near-surface intersections to the southwest of the 2015 pit shell have led to the decision to now update the Marathon Deposit resources. The Marathon Deposit continues to exceed expectations," said Phillip Walford, President and CEO of Marathon. "The start to the new year is looking very positive as Marathon Gold resumes its aggressive drilling program at the Valentine Lake Gold Camp to continue building gold resources."

TABLE 1: Significant fire assay intervals from drill holes MA-16-150 to MA-16-152, and extended MA-16-109, Marathon Gold Deposit, Valentine Lake Gold Camp.

DDH	Section	From	To	Core Length (m)	True Width (m)	Gold g/t	Gold g/t (cut)

All of the samples were fire assayed at Eastern Analytical Laboratory Ltd., in Springdale, Newfoundland.

[Marathon Gold Corp.](#) acknowledges the financial support of the JEA Program, Department of Natural Resources, Government of Newfoundland and Labrador. The Research and Development Corporation of Newfoundland and Labrador has granted approximately 75% of the costs of the current metallurgical program to Marathon Gold and we appreciate this support.

Sherry Dunsworth, M.Sc., P. Geo., VP of Exploration, Marathon's Qualified Person, has reviewed the contents for accuracy and has approved this press release on behalf of Marathon. All core samples were collected using established QC/QA protocols including insertion of blanks, standards and duplicates at regular intervals in each sample batch. All reported core samples were analyzed for Au by fire assay (30g) with AA finish at Eastern Analytical Limited, Springdale, NL. Significant mineralized intervals are reported in Table 1 as core lengths and estimated true thickness (70-85% of core length).

About Marathon Gold

[Marathon Gold Corp.](#) (TSX: MOZ) is a gold exploration company rapidly advancing its 100% owned Valentine Lake Gold Camp located in Newfoundland, one of the top mining jurisdictions in the world. The Valentine Lake property currently hosts four near-surface, mainly pit-shell constrained, gold resources totaling 1,060,100 oz. gold at 2.20 g/t (Measured & Indicated) and 200,000 oz. gold at 2.85 g/t (Inferred), (April 2015). These resources occur over a 20-km system of gold bearing veins - much of the 24,000-hectare property has not been explored in detail to date. The 2016 drilling campaign at the Marathon Deposit has outlined a significant underground resource in addition to the current resource. Drilling in 2017 will continue to focus on expanding the Marathon Deposit at surface and to depth with a resource updated expected in the second quarter of 2017. The property is accessible by year-round road, and is located within Newfoundland's electrical grid. The Company has constructed and maintains a 50-person all-season camp at the project. Recent metallurgical tests have demonstrated 93% to 98% recoveries via conventional milling and 50% to 70% recoveries via low cost heap leaching at both the Leprechaun and Marathon Deposits. To find out more information on the Valentine Lake Gold Camp please visit www.marathon-gold.com.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

Except for statements of historical fact relating to [Marathon Gold Corp.](#), certain information contained herein constitutes "forward-looking statements". Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "plans", "believes", "considers", "intends", "targets", or negative versions thereof and other similar expressions, or future or conditional verbs such as "may", "will", "should", "would" and "could". We provide forward-looking statements for the purpose of conveying information about our current expectations and plans relating to the future and readers are cautioned that such statements may not be appropriate for other purposes. By its nature, this information is subject to inherent risks and uncertainties that may be general or specific and which give rise to the possibility that expectations, forecasts, predictions, projections or conclusions will not prove to be accurate, that assumptions may not be correct and that objectives, strategic goals and priorities will not be achieved. These risks and uncertainties include but are not limited to those identified and reported in [Marathon Gold Corp.](#)'s public filings, which may be accessed at www.sedar.com. Other than as specifically required by law, we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made, or to reflect the occurrence of unanticipated events, whether as a result of new information, future events, results or otherwise.
