

Metals Creek Resources Corp. Stakes Claims on the Great Northern Peninsula, Newfoundland

21.11.2017 | [Newsfile](#)

Toronto, November 21, 2017 - [Metals Creek Resources Corp.](#) (TSXV: MEK) (Metals Creek or the "company") would like to announce it has acquired by staking, a 100% interest in four claim blocks totaling 242 units on the Great Northern Peninsula Newfoundland, near St. Anthony, named the Great Brehat Project. The Claims are contiguous to the south and to the west of White Metals Resources Corp. new discovery where they recently announced significant amounts of highly anomalous gold values over approximately a 15 sq KM area in black sedimentary shale units (See White Metals Resources Corp. PR dated November 20, 2017). The Metals Creek claims were staked to cover favorable geology similar to that of White Metals Resources Corp. The company believes this could potentially be a very important new discovery in a unique geological environment similar to other large gold deposits hosted in black shale environments around the world. The company will plan an exploration program to evaluate the geological potential over the coming months.
