

LithiumOre Increases its Commercial Outlook with Large Quantities of Soda Ash and Potash in Railroad Valley Pool

18.03.2019 | [ACCESS Newswire](#)

New Outlook is in Addition to its Vast Amounts of Lithium

INCLINE VILLAGE, NV / ACCESSWIRE / March 18, 2019 / LithiumOre (<http://lithiumore.net>) (the "Company"), a wholly-owned subsidiary of [Oroplata Resources Inc.](#) (OTCQB: ORRP), a lithium resource exploration and development company, is pleased to report that in addition to its estimated amounts of lithium, the Company's brine pool contains large commercial quantities of soda ash and potash. These findings dramatically increase the Company's commercial outlook.

LithiumOre's early scientific studies suggest that Railroad valley brines may contain multiple minerals along with sulfates and carbonates (considered as valuable anions in comparison with chlorides), amounting to significant 35-37 weight percentage solids. This finding may be great news for LithiumOre's exploration for battery metals and other valuable minerals. Presence potassium, sodium, magnesium, manganese and zinc, besides lithium, especially in the form of sulfates or carbonates may tremendously enhances the value minerals. For example, the value of potassium sulfate or carbonate may be 3-5 times higher than corresponding potassium chloride salt. LithiumOre is consulting with scientific experts to explore the possibility of cost effectively recovering high value minerals with an emphasis on chemicals used in the battery industry.

Made in America, LithiumOre holds 1,300 lithium mineral claims, totaling 26,000 acres, located in Railroad Valley of Nye County, Nevada. Railroad Valley is approximately 112 miles northeast of Clayton Valley and can be accessed by paved highway directly from U.S. Route 6. Railroad Valley is one of Nevada's largest trapped basins and is noted to hold all the necessary commercial and engineering prerequisites for a massive lithium brine deposit. The Company's claims have been evaluated by experts and the BLM and are in planned on-site exploration.

LithiumOre, Corp.

LithiumOre (<http://lithiumore.net>), a wholly-owned subsidiary of [Oroplata Resources Inc.](#) (OTCQB: ORRP), is a lithium resource exploration and development company, whose primary focus is the establishment of a low cost production base to supply the rapidly growing lithium-ion battery industry for both mobile devices and laptops, as well as the burgeoning EV (electric vehicle) industry. LithiumOre is focused on becoming a substantial, profitable lithium producer via the timely development of valuable production-grade lithium brine deposits in Nevada.

Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, including those with respect to the expected project economics for Western Nevada Basin (Railroad Valley), including estimates of life of mine, average production, cash costs, AISC, initial CAPEX, sustaining CAPEX, pre-tax IRR, pre-tax NPV, net cash flows and recovery rates, the impact of self-mining versus

contract mining, the timing to obtain necessary permits, the submission of the project for final investment approval and the timing of initial gold production after investment approval and full financing, metallurgy and processing expectations, the mineral resource estimate, expectations regarding the ability to expand the mineral resource through future drilling, ongoing work to be conducted at the Western Nevada Basin (Railroad Valley), and the potential results of such efforts, the potential commissioning of a Pre-Feasibility study and the effects on timing of the project, are "forward-looking statements." Although the Company's management believes that such forward-looking statements are reasonable, it cannot guarantee that such expectations are, or will be, correct. These forward-looking statements involve a number of risks and uncertainties, which could cause the Company's future results to differ materially from those anticipated. Potential risks and uncertainties include, among others, interpretations or reinterpretations of geologic information, unfavorable exploration results, inability to obtain permits required for future exploration, development or production, general economic conditions and conditions affecting the industries in which the Company operates; the uncertainty of regulatory requirements and approvals; fluctuating mineral and commodity prices, final investment approval and the ability to obtain necessary financing on acceptable terms or at all. Additional information regarding the factors that may cause actual results to differ materially from these forward-looking statements is available in the Company's filings with the Securities and Exchange Commission, including the Annual Report on Form 10-K for the year ended September 30, 2018. The Company assumes no obligation to update any of the information contained or referenced in this press release.
