

Endomines Engages MZ Group to Lead Strategic Investor Relations and Shareholder Communication Program

11.06.2020 | [ACCESS Newswire](#)

STOCKHOLM, June 11, 2020 - [Endomines AB](#) (Nasdaq Stockholm:ENDO), a mining and exploration company with a primary focus on gold, has engaged international investor relations specialists MZ Group (MZ) to lead a comprehensive strategic investor relations and financial communications program across all key markets.

MZ Group will work closely with Endomines management to develop and implement a comprehensive capital markets strategy designed to increase the Company's visibility throughout the investment community. The complete investor relations campaign will highlight the Company's recent operational successes, such as bringing the Friday Mine located in Idaho, USA, into production - including the first shipment of gold concentrate and its potential US listing.

MZ has developed a distinguished reputation as a premier resource for institutional investors, brokers, analysts and private investors. The firm maintains offices worldwide, including New York, Chicago, Minneapolis, San Diego, Newport Beach, Austin, Taipei, and São Paulo. Additionally, MZ Group was recently ranked the No. 1 consultancy in Latin America and No. 7 in the world in business communication.

Senior Managing Director and Head of MZ North America's Orange County Office, Chris Tyson, will advise Endomines in all facets of corporate and financial communications, including the coordination of roadshows and investment conferences across key cities and building brand awareness with all financial and social media outlets.

Ted Haberfield, Chairman of MZ Group North America, commented: "We are pleased to announce our re-entry into the metals and mining sector with this engagement. Endomines is an exciting, emerging player within the global gold mining sector focused on the development of highly competitive, economic mines in stable jurisdictions. Endomines is well-positioned to grow the value of their projects through continued successful development.

"The robust asset base, comprised of both operating mines and projects under development, paired with strong industry tailwinds driven by the increased macroeconomic uncertainty, creating elevated demand for gold by central banks, institutions and consumers globally, positions Endomines to create notable shareholder value over the long-term. We see continued investor interest in gold mining stocks relative to physical gold positions or gold futures, given the opportunity for earnings and growth above the market price of gold alone through operational execution at the mine level. We look forward to working with management to communicate the Company's value proposition and what I view as a clear valuation disconnect to the investment community," concluded Haberfield.

Chris Tyson, Senior Managing Director of MZ Group North America, said: "Endomines is clearly at a financial inflection point as they have reached commercial production at the Friday Mine in Idaho with positive cash flow projected in June 2020. The successful commissioning of the Orogrande Processing Facility and recent offtake agreement for the gold concentrate with H&H Metals secures a sales outlet with meaningful revenue generation. It is encouraging from a capital markets perspective, to see a world-class mining special purpose acquisition company (SPAC) domiciled in the United States recently close at a premium with marquee institutional investor support. This not only demonstrates the renewed interest in the gold sector from sponsors but also strong demand from the buy-side," concluded Tyson.

"This is an exciting time for Endomines, having acquired a significant base of new assets throughout the United States to develop, following up on the success of our Pampalo mine," said Greg Smith, Chief

Executive Officer of Endomines. "Our mineral resources, comprised of nearly one million ounces of gold, provides us with an incredible monetization opportunity in an increasingly strong market for gold. Together with MZ, we will enhance our investor communications and awareness efforts to realize Endomines' intrinsic value in the capital markets. We are also exploring alternatives for a potential US listing in 2020, while maintaining our Nasdaq listing in Stockholm and Helsinki to enable global expansion of our investor base," concluded Smith.
