

Nighthawk Files Technical Report for Mineral Resource Estimate on the Indin Lake Gold Project

11.09.2020 | [ACCESS Newswire](#)

TORONTO, September 11, 2020 - [Nighthawk Gold Corp.](#) ("Nighthawk" or the "Company") (TSX:NHK) (OTCQX:MIMZF) announces today that it has filed a National Instrument 43-101 ("NI 43-101") compliant technical report titled "NI 43-101 Technical Report and Mineral Resource Estimate for the Indin Lake Gold Property, Northwest Territories, Canada", outlining an updated indicated and inferred resource estimate for the Colomac Gold Project, and an initial inferred resource estimate for the Damoti Lake Gold Project, as announced July 28, 2020.

The Technical Report is available under the Company's profile on SEDAR at www.sedar.com and on the Company website at www.nighthawkgold.com.

About Us

Nighthawk is a Canadian-based gold exploration company with 100% ownership of a district-scale land position within the Indin Lake Greenstone Belt, located approximately 200 km north of Yellowknife, Northwest Territories, Canada. Nighthawk has advanced its flagship asset Colomac, outlining a robust project with current Indicated Resources of 25.89 Mt with an average grade of 2.01 gpt Au for 1.67 Moz of gold and Inferred Resources of 5.71 Mt with an average grade of 2.03 gpt Au for 0.37 Moz of gold, with the majority of ounces contained within an underground resource. Near-term resource expansion opportunities exist proximal to the current resources, and additional upside exists throughout the +7km strike length of the host quartz diorite with a substantial opportunity at depth where the true width is known to expand significantly across a 3.5km-long section. Within this largely underexplored Archean gold camp, the Company has identified several high-priority targets within large regional deformation zones that are pregnant with gold mineralization and are known to host significant deposits which warrant additional exploration and follow-up.

The Company has an experienced and dedicated team with a track record of successfully advancing projects and is well funded and supported to complete its goals and objectives.

Qualified Person

Technical information related to the 2020 Mineral Resource Estimate on the 100% owned Indin Lake Gold Property (the "2020 MRE") was reviewed and approved by Marina Iund, M.Sc., P.Geol., Project Geologist and Carl Pelletier, P.Geol., Co-President Founder of InnovExplo who are independent Qualified Persons as defined by NI 43-101, with the ability and authority to verify the authenticity and validity of this data. Please refer to NI 43-101 technical report "NI 43-101 Technical Report and Mineral Resource Estimate for the Indin Lake Gold Property, Northwest Territories, Canada", dated September 11, 2020, as filed under the company's profile on www.sedar.com.

Forward-Looking Information

This news release contains "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking information includes, but is not limited to, information with respect to the 2020 MRE. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects", or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "does not anticipate", or "believes" or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might", or "will be taken", "occur", or "be achieved".

Forward-looking information is based on the opinions and estimates of management at the date the information is made, and is based on a number of assumptions and is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Nighthawk to be materially different from those expressed or implied by such forward-looking information, including risks associated with the exploration, development and mining such as economic factors as they effect exploration, future commodity prices, changes in foreign exchange and interest rates, actual results of current exploration activities, government regulation, political or economic developments, environmental risks, permitting timelines, capital expenditures, operating or technical difficulties in connection with development activities, employee relations, the speculative nature of gold exploration and development, including the risks of diminishing quantities of grades of reserves, contests over title to properties, and changes in project parameters as plans continue to be refined as well as those risk factors discussed in Nighthawk's annual information form for the year ended December 31, 2019, available on www.sedar.com. Although Nighthawk has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on forward-looking information. Nighthawk does not undertake to update any forward-looking information, except in accordance with applicable securities laws.
