

Ivanhoe Mines Reports Fatality at the Kamoá-Kakula Copper Project

04.06.2021 | [Newsfile](#)

Kolwezi, June 4, 2021 - Ivanhoe Mines (TSX: IVN) (OTCQX: IVPAF) regrets to report that a fatal accident occurred at the Kamoá-Kakula Copper Project in the Democratic Republic of Congo (DRC).

The accident occurred underground at the Kakula Mine when a contractor's employee was hit in the leg by a loose rock while he was working at one of the mine's working faces, which caused the employee to fall backwards, striking his head on a rock. Despite immediate first-aid assistance by his colleagues, he passed away at the accident scene.

As well as investigating the accident internally, the Kamoá-Kakula senior management team and the contractor's management team are working with the DRC authorities to facilitate their investigation of the accident.

The Kamoá-Kakula Copper Project is a joint venture between Ivanhoe Mines (39.6%), Zijin Mining Group (39.6%), Crystal River Global Limited (0.8%) and the DRC government (20%).

About Ivanhoe Mines

Ivanhoe Mines is a Canadian mining company focused on advancing its three principal joint-venture projects in Southern Africa: the development of major new, mechanized, underground mines at the Kamoá-Kakula copper discoveries in the Democratic Republic of Congo and at the Platreef palladium-rhodium-platinum-nickel-copper-gold discovery in South Africa; and the extensive redevelopment and upgrading of the historic Kipushi zinc-copper-germanium-silver mine, also in the Democratic Republic of Congo .

Kamoá-Kakula began producing copper concentrates in May 2021 and, through phased expansions, is positioned to become one of the world's largest copper producers. Kamoá-Kakula and Kipushi will be powered by clean, renewable hydro-generated electricity and will be among the world's lowest greenhouse gas emitters per unit of metal produced. Ivanhoe Mines has pledged to achieve net-zero operational greenhouse gas emissions (Scope 1 and 2) at the Kamoá-Kakula Copper Mine when large-scale electric, hydrogen and hybrid underground mining equipment become commercially available. Ivanhoe also is exploring for new copper discoveries on its Western Foreland exploration licences in the Democratic Republic of Congo, near the Kamoá-Kakula Project.
