

Anacortes Announces Update on Drilling Program at The Tres Cruces Project

28.04.2022 | [Newsfile](#)

Vancouver, April 28, 2022 - [Anacortes Mining Corp.](#) (TSXV: XYZ) (OTCQB: XYZFF) ("Anacortes" or the "Company") is pleased to provide an update on the upcoming drilling program at its Tres Cruces gold project in the prolific Quiruvilca Mining District in northern Perú.

The Company previously reported that its wholly owned Peruvian subsidiary, Aurifera Tres Cruces S.A. ("ATC") received approval on March 11, 2022, of the Ficha Technical Ambiental (FTA), the environmental instrument utilized for permitting the exploration drilling program at Tres Cruces.

Subsequent to the approval of the FTA, ATC submitted an application to begin drilling activities, an authorization that includes a further review by the Peruvian Ministry of Energy and Mines (MINEM). As part of this review process, MINEM requested further information from the Company. ATC has submitted this information and final approval of the drilling program is now expected by mid to late May.

In the meantime, drilling contractor Remicsa Drilling S.A. ("Redrilsa") is ready to mobilize, and ATC has selected ALS Global's Peruvian subsidiary, ALS Perú S.A., to carry out the assay services for the drilling campaign. ALS has committed to providing a quick turnaround on assays once drilling commences.

Jim Currie, CEO of Anacortes, commented: "While we are obviously disappointed by this slight delay, we are committed to working with the Peruvian regulators and following all applicable rules and regulations related to exploring and developing Tres Cruces. The gold is still there in the ground and awaits the arrival of the drills. We are looking forward to testing holes that Barrick drilled that ended in mineralization, particularly Hole RTC-255, where the bottom 173.0 m from 92.0 m to 265.0 m had a grade of 3.118 g/t Au."

The Company will provide further updates as it gets closer to the start of the drilling program.

About Anacortes

Anacortes is a new growth-oriented gold company in the Americas, which owns a 100-per-cent interest in the Tres Cruces gold project located in Peru. Tres Cruces is one of the highest-grade oxide deposits globally and hosts oxide plus sulphide indicated resources of 2,474,000 oz at 1.65 g/t gold, inclusive of 630,000 oz of high-grade leachable gold at 1.28 g/t gold and inferred resources of 104,000 oz at 1.26 g/t gold. The recently released PEA on the leachable resource at Tres Cruces indicates a robust open-pit, heap leach project. Anacortes is well capitalized and intends to aggressively advance the Tres Cruces Oxide Project through feasibility, permitting and to production as quickly as possible. Additionally, Anacortes will continue to seek further growth opportunities in the Americas, with the goal of creating the next mid-tier multi-asset gold producer.

Cautionary Statement on Forward-Looking Information

This news release contains forward-looking statements which constitute "forward-looking information" within the meaning of applicable Canadian securities legislation ("Forward-looking Statements"). All statements included herein, other than statements of historical fact, are Forward-looking Statements and are subject to a variety of known and unknown risks and uncertainties which could cause actual events or results to differ materially from those reflected in the Forward-looking Statements.

The Forward-looking Statements in this news release may include, without limitation, statements about the Company's belief that Tres Cruces has exceptional exploration potential at depth, date at which drilling is

expected to commence, its intent to aggressively advance the development of the oxide resource, its expectation that its proposed drill program can test the extent of the deposit and increase confidence in the resource, the design of the project as contemplated in the PEA and this press release, the Company's plans to conduct an extensive metallurgical program during 2022 and its expectation that such a program would confirm recovery and, finally, the Company's intent to aggressively advance Tres Cruces through feasibility and to production under a heap leach open-pit scenario. Often, but not always, these Forward-looking Statements can be identified by the use of words such as "anticipated", "estimated", "potential", "open", "future", "assumed", "projected", "used", "detailed", "has been", "gain", "planned", "reflecting", "will", "anticipated", "estimated", "containing", "remaining", "to be", or statements that events, "could" or "should" occur or be achieved and similar expressions, including negative variations.

Forward-looking Statements involve known and unknown risks, uncertainties and other factors, many of which are beyond the ability of the Company to control or predict and which may cause actual results, performance or achievements to be materially different from any results, performance or achievements expressed or implied by the Forward-looking Statements. These risks include changes in general economic conditions and financial markets; political risks; risks relating to the current and potential adverse impacts of the COVID-19 pandemic on the economy, financial markets and the Company's operations; and risks inherent in mineral exploration and development. Although Forward-looking Statements contained in this news release are based upon what each of the parties believe are reasonable assumptions at the time they were made, such statements are made as of the date hereof and the Company disclaims any obligation to update any Forward-looking Statements, whether as a result of new information, future events or results or otherwise, except as required by law. There can be no assurance that these Forward-looking Statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, the reader should not place undue reliance on Forward-looking Statements.

The TSXV has in no way approved or disapproved of the contents of this press release.
