Toronto, July 7, 2022 - [Olive Resource Capital Inc.](#) (TSXV: OC) ("Olive" or the "Company") is pleased to provide investors an updated, unaudited Net Asset Value ("NAV") per share. Management has estimated the NAV of the Company at C\$0.073 per share for June 30, 2022 (Table 1). At the end of June, the Company's price per share was C\$0.045.

Table 1: Olive NAV Breakdown

Name	Ticker	Value	Value per Share
Rockcliff Metals Corp.	RCLF:CSE	\$2,539,050	\$0.036
Nevada Zinc Corp.	NZN:TSXv	\$829,680	\$0.012
Minera Alamos Inc.	MAI:TSXv	\$686,000	\$0.010
Other Investments & Working Capital		\$1,079,488	\$0.015
Total		\$5,134,218	\$0.073

Samuel Pelaez, the Company's President, CEO, CIO and Director stated: "The global macroeconomic picture worsened dramatically in June. Interest rate increases around the developed world continue to syphon off liquidity from risk markets, and in particular from junior resource equities. Olive continued to reduce its exposure to resource equities and raised cash where possible, in line with its models. For the month of June, Olive's liquid portfolio dropped approximately 10%, faring substantially better than the Canadian junior mining markets which dropped approximately 19%. Unfortunately, our core investment portfolio dropped approximately 30% in thin trading volumes, leading to a substantial decrease in NAVPS."

Derek Macpherson, Executive Chairman stated: "Approximately 64% of Olive's NAVPS decrease related to its largest investment, Rockcliff Metals, where the share price decreased approximately 36% in June despite no fundamental change. Rockcliff's share price decreased over 22% on the last day of the month on very thin volume. In management's view, this is indicative of the current illiquid market and not a reflection of the fundamental value of the company. Olive is pursuing a strategy of growing and diversifying its investments is to reduce single asset risk and increase investment liquidity. The company's first step to achieving this objective is the acquisition of CannalIncome Fund's assets, which we expect to close later this month."

Use of Non-GAAP Financial Measures:

This press release contains references to NAV or "net asset value per share" which is a non-GAAP financial measure. NAV is calculated as the value of total assets less the value of total liabilities divided by the total number of common shares outstanding as at a specific date. The term NAV does not have any standardized meaning according to GAAP and therefore may not be comparable to similar measures presented by other companies. There is no comparable GAAP financial measure presented in the Company's consolidated financial statements and thus no applicable quantitative reconciliation for such non-GAAP financial measure. The Company believes that the measure provides information useful to its shareholders in understanding the Company's performance, and may assist in the evaluation of the Company's business relative to that of its peers. This data is furnished to provide additional information and does not have any standardized meaning prescribed by GAAP. Accordingly, it should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP, and is not necessarily indicative of other metrics presented in accordance with GAAP. Existing NAV of the Company is not necessarily predictive of the Company's future performance or the NAV of the Company as at any future date.
