

Ranger Oil Corporation Reports Second Quarter Results

02.08.2022 | [ACCESS Newswire](#)

Achieved high-end of sales volumes guidance
Closed additional bolt-on acquisitions and updated share repurchase progress
Increased full-year 2022 sales volumes outlook and updated capital guidance

HOUSTON, August 2, 2022 - [Ranger Oil Corp.](#) ("Ranger" or the "Company") (Nasdaq:ROCC) today announced financial and operational results for the second quarter of 2022.

Second Quarter Highlights:

- Achieved upper-end of quarterly sales guidance with total sales of 38.5 thousand barrels of oil equivalent per day ("Mboe/d") and crude oil sales of 27.5 thousand barrels per day ("Mbbl/d")
- Posted net income of \$148.0 million and adjusted net income¹ of \$120.4 million
- Generated adjusted EBITDAX¹ of \$189.8 million and net cash provided by operating activities of \$165.0 million
- Produced pro forma adjusted free cash flow¹ of \$61.6 million
- Drilling and completion ("D&C") capital expenditures were \$122.1 million
- Strong second quarter sales volumes, recent acquisitions and increased activity associated with the acquisitions have allowed the Company to increase the mid-point of its full-year 2022 total sales volumes outlook by more than 1.2 Mboe/d
- Recently closed additional bolt-on transactions, bringing year-to-date acquisitions in the Eagle Ford to eight transactions with initial purchase prices totaling approximately \$139 million, subject to customary adjustments. The transactions, which closed late in the second quarter and early in the third quarter, added current production, approximately 20,000 net acres and additional high-return development opportunities
- As of July 29, 2022, approximately \$46 million had been returned to shareholders through share repurchases since program initiation in May 2022
- Continued strengthening of capital structure with a leverage ratio² of approximately 0.8x at quarter-end, incorporating approximately \$50 million reduction in total net debt¹ since year-end 2021

"We continue to perform exceptionally well year-to-date, generating significant free cash flow through disciplined investments while capturing numerous accretive bolt-ons that are expected to add value for years to come," said Ranger President and CEO, Darrin Henke. "For the second quarter, our capital investments remained on track and our sales volumes were at the high-end of our guidance. During the quarter, we were able to expand our cash return framework as we reloaded and extended our share buyback program and initiated our first quarterly dividend. We have significantly increased our cash flow through both organic growth and strategic consolidation while simultaneously decreasing our share count and leverage. This has resulted in significant growth in cash-on-cash returns for our investors."

Second Quarter 2022 Financial and Operating Results

Ranger reported a second quarter 2022 net income of \$148.0 million. Adjusted net income¹ was \$120.4 million for the second quarter of 2022. Ranger posted adjusted EBITDAX¹ of \$189.8 million, net cash provided by operating activities of \$165.0 million and generated pro forma adjusted free cash flow¹ of \$61.6 million during the quarter.

Total operating expenses for the second quarter of 2022 were \$109.2 million, or \$31.20 per boe. Adjusted direct operating expenses¹ were \$52.5 million, or \$14.98 per boe, in the second quarter of 2022 which consist of lease operating expenses ("LOE"), gathering, processing and transportation expenses ("GPT"), production and ad valorem taxes, and adjusted cash general and administrative expenses¹ ("G&A"), excluding depreciation, depletion and amortization ("DD&A") and significant special charges. A breakdown of

operating expenses, as well as guidance for the remainder of the year, can be found in additional tables included in this release.

Total sales volumes for the second quarter of 2022 were at the upper-end of Ranger's guidance at 38.5 Mboe/d (71% crude oil/86% liquids). Oil sales during the quarter were 27.5 Mbbl/d, also toward the high-end of Ranger's previous guidance (26.6 - 27.8 Mbbl/d).

Expanded Shareholder Return Program

Ranger recently expanded its cash return framework for shareholders, increasing its share buyback authorization and declaring a cash dividend.

- As of July 29, 2022, Ranger has repurchased approximately \$46 million (1.35 million shares) of its Class A common stock, or more than 3% of total equity outstanding, at an average price of approximately \$33.67 per share.
- In early July, Ranger's Board of Directors increased its share repurchase authorization by \$40 million to \$140 million and extended the program term through June 30, 2023.
- The Board declared an inaugural cash dividend of \$0.075 per share of Class A common stock, payable August 4, 2022 to Class A common stockholders of record as of the close of business on July 25, 2022.

2022 Outlook

Along with the increase in anticipated sales volumes for 2022 noted above, Ranger expects its capital expenditures for the original 2022 development plan ("Initial D&C") to remain within the previously announced range at approximately \$425 million, due to the Company effectively managing the ongoing inflationary environment. In addition, as a result of sustained operating efficiencies driving accelerated development activity, combined with increased working interests and longer laterals following recent bolt-ons, Ranger is increasing its capital expenditures outlook by an incremental \$30 million ("Incremental D&C"). The Incremental D&C is expected to benefit future sales volumes and increase development efficiencies.

Ranger's third quarter capital expenditure guidance reflects its temporary use of a third drilling rig, which is developing assets located in LaSalle County, approximately 180 miles southwest of Ranger's development activity in Gonzales and Lavaca counties. After the wells in LaSalle are completed, which is anticipated to conclude in the third quarter, Ranger expects to maintain a two-rig development pace in the fourth quarter. The Company is considering adding a third rig to its development program in early 2023 based on its decreasing leverage, increased acreage position, and the strong projected returns and free cash flow generated by its deep inventory at current commodity prices. This potential increase in activity would create additional momentum in early 2023 and significantly benefit full-year 2023 sales volumes.

The table below sets forth the Company's updated operational and financial guidance for the third quarter and full-year 2022 as well as a summary of prior guidance as reported in March and May 2022:

Full Year 2022				
	Prior March 2022 Outlook Midpoint ⁴	Prior May 2022 Outlook Midpoint ⁴	Current Outlook	3Q 2022
Total Sales Volumes (boe/d)	39,750	40,000	40,400 - 42,000	40,900 - 42,500
Oil Sales Volumes (bbl/d)	28,500	28,750	28,700 - 30,300	29,900 - 31,100

Balance Sheet and Liquidity

As of June 30, 2022, Ranger had \$400 million of senior unsecured notes and approximately \$137 million drawn, net of cash, on its revolving credit facility. This represents a reduction in net debt¹ from year-end 2021 to June 30, 2022 of approximately \$50 million. The Company's borrowing base under its revolving credit facility was recently increased to \$875 million, with elected commitments of \$400 million. Ranger is currently undergoing an additional borrowing base redetermination to reflect the Company's recent increase in producing reserves and bolt-on acquisitions.

1 Adjusted EBITDAX, pro forma adjusted free cash flow, adjusted net income, net debt, LTM pro forma adjusted EBITDAX, adjusted direct operating expenses and adjusted cash G&A are non-GAAP supplemental financial measures. See the definitions and reconciliation to their most comparable GAAP measures within this release.

2 Leverage Ratio defined as net debt divided by LTM pro forma adjusted EBITDAX.

3 Represents mid-point of expected range.

4 Prior guidance is provided for reference only; Ranger is not restating prior guidance.

Conference Call and Webcast Details

Ranger plans to hold a conference call and webcast at 10 a.m. ET on Wednesday, August 3, 2022. Supplemental slides, which the Company plans to reference during the call, have been posted to its website at www.RangerOil.com. To participate in the conference call, please dial (844) 707-6931 (international: (412) 317-9248) approximately 10 minutes prior to the scheduled start time. For the webcast, please log in to Ranger's website at least 15 minutes prior to the scheduled start time to download supporting materials and install necessary audio software.

A replay of the webcast (posted shortly after the call) will be available on the Company's website through August 11, 2022. The replay can be accessed by phone by dialing (877) 344-7529 (international (412) 317-0088) and entering passcode 4467021.

About Ranger Oil Corporation

Ranger Oil is a pure-play independent oil and gas company engaged in the development and production of oil, NGLs, and natural gas, with operations in the Eagle Ford shale in South Texas. For more information, please visit our website at www.RangerOil.com.

Cautionary Statements Regarding Guidance and Other Matters

The estimates and guidance discussed in this release are based on assumptions of current and future capital expenditure levels, prices for oil, NGLs, and natural gas, available liquidity, indications of supply and demand for oil, well results, and operating costs. This release does not constitute any form of guarantee or assurance that the matters indicated will be achieved. While we believe these estimates and the assumptions on which they are based are reasonable as of the date on which they are made, they are inherently uncertain and are subject to, among other things, significant business, economic, operational, and regulatory risks, and uncertainties, some of which are not known as of the date of the statement. Guidance and estimates, and the assumptions on which they are based, are subject to material revision. Actual results may differ materially from estimates and guidance. Further, expectations regarding the announced share repurchase program are subject to a variety of factors, including among other things, our earnings, liquidity, capital requirements, financial condition, management's assessment of the intrinsic value of the Class A common stock, the market price of the Company's Class A common stock, general market and economic conditions, available liquidity, compliance with the Company's debt and other agreements, applicable legal requirements and other factors deemed relevant. In connection with any dividend, Ranger's operating subsidiary will also make a corresponding distribution to its common unitholders. Please read the "Forward-Looking Statements" section below, as well as "Risk Factors" in our annual report on Form 10-K and our quarterly reports on Form 10-Q, which are incorporated herein.

Forward-Looking Statements

This communication contains certain "forward-looking" statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements that are not historical facts are forward-looking statements, and such statements generally include, words such as "anticipate," "target," "guidance," "assumptions," "projects," "forward," "estimates," "outlook," "guidance," "expects," "consider," "continues," "project," "intends," "plans," "believes," "future," "potential," "may," "foresee," "possible," "should," "would," "could," "focus" and variations of such words or similar expressions, including the negative thereof, to identify that they are forward-looking statements. Because such statements include assumptions, risks, uncertainties, and contingencies, actual results may differ materially from those expressed or implied by such forward-looking statements. These risks, uncertainties and contingencies include, but are not limited to, the following: the risk that the benefits of the acquisition of Lonestar may not be fully realized or may take longer to realize than expected, and that management attention will be diverted to integration-related issues; the impact of the COVID-19 pandemic, economic slowdown, governmental actions, stay-at-home orders, interruptions to our operations or our customer's operations; risks related to and the impact of actual or anticipated other world health events; our ability to satisfy our short-term and long-term liquidity needs, including our ability to generate sufficient cash flows from operations or to obtain adequate financing; our ability to maintain our relationships with our suppliers, service providers, customers, employees, and other third parties; our ability to execute our

business plan in volatile commodity price environments; our ability to develop, explore for, acquire and replace oil and gas reserves and sustain production; changes to our drilling and development program; our ability to generate profits or achieve targeted reserves in our development and exploratory drilling and well operations; our ability to realize expected operating efficiencies; our ability to meet guidance, market expectations and internal projections, including type curves; the projected demand for and supply of oil, NGLs and natural gas; our ability to contract for drilling rigs, frac crews, materials, supplies and services at reasonable costs; our ability to renew or replace expiring contracts on acceptable terms; our ability to obtain adequate pipeline transportation capacity or other transportation for our oil and gas production at reasonable cost and to sell our production at, or at reasonable discounts to, market prices; the uncertainties inherent in projecting future rates of production for our wells and the extent to which actual production differs from that estimated in our proved oil and gas reserves; use of new techniques in our development, including choke management and longer laterals; our ability to repurchase shares pursuant to our announced share repurchase program or declare dividends; drilling, completion and operating risks, including adverse impacts associated with well spacing and a high concentration of activity; our ability to convert drilling locations into reserves and production, if at all; the longevity of our currently estimated inventory; and other risks set forth in our filings with the SEC, including our most recent Annual Report on Form 10-K and subsequent Quarterly Reports on Form 10-Q. Additional Information concerning these and other factors can be found in our press releases and public filings with the SEC. Many of the factors that will determine our future results are beyond the ability of management to control or predict. In addition, readers should not place undue reliance on forward-looking statements, which reflect management's views only as of the date hereof. The statements in this communication speak only as of the date of the communication. We undertake no obligation to revise or update any forward-looking statements, or to make any other forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable law.

CERTAIN NON-GAAP FINANCIAL MEASURES (UNAUDITED)

Readers are reminded that non-GAAP measures are merely a supplement to, and not a replacement for, or superior to financial measures prepared according to GAAP. They should be evaluated in conjunction with the GAAP financial measures. It should be noted as well that our non-GAAP information may be different from the non-GAAP information provided by other companies.

Reconciliation of GAAP "Realized prices" to Non-GAAP "Realized prices, including effects of derivatives, net"

We present our realized prices for crude oil, natural gas and aggregate (including crude oil, NGLs and

natural gas), as adjusted for the effects of derivatives, net as we believe these measures are useful to management and stakeholders in determining the effectiveness of our price-risk management program that is designed to reduce the volatility associated with our operations. Realized prices for crude oil, NGLs, natural gas and aggregate, as adjusted for the effects of derivatives, net, are supplemental financial measures that are not prepared in accordance with generally accepted accounting principles ("GAAP"). The following table presents the calculation of our non-GAAP realized prices for crude oil, NGLs, natural gas and aggregate, as adjusted for the effects of derivatives, net and reconciles to realized prices for crude oil, NGLs, natural gas and aggregate determined in accordance with GAAP:

Effects of derivatives includes, as applicable to the period presented: (i) current period commodity derivative settlements; (ii) the impact of option premiums paid or received in prior periods related to current period production; (iii) the impact of prior period cash settlements of early-terminated derivatives originally designated to settle against current period production; (iv) the exclusion of option premiums paid or received in current period related to future period production; and (v) the exclusion of the impact of current period cash settlements for early-terminated derivatives originally designated to settle against future period production.

Reconciliation of GAAP "Net income (loss)" to Non-GAAP "Adjusted net income"

Adjusted net income is a non-GAAP financial measure that represents net income (loss) adjusted to include net realized settlements of derivatives and exclude the effects, net of income taxes, of non-cash changes in the fair value of derivatives, impairments of oil and gas properties, the effects of gains and losses on the sales of assets, (gain) loss on extinguishment of debt, acquisition, integration and strategic transaction costs, and organizational restructuring costs, including severance. We believe that non-GAAP adjusted net income provides meaningful supplemental information regarding our operational performance. This information facilitates management's internal comparisons to the Company's historical operating results as well as to the operating results of our competitors. Since management finds this measure to be useful, the Company believes that our investors can benefit by evaluating both non-GAAP and GAAP results. Adjusted net income is not a measure of financial performance under GAAP and should not be considered as a measure of liquidity or as an alternative to net income (loss).

¹ Realized settlements, net includes, as applicable to the period presented: (i) current period commodity and interest rate derivative settlements; (ii) the impact of option premiums paid or received in prior periods related to current period production; (iii) the impact of prior period cash settlements of early-terminated derivatives originally designated to settle against current period production; (iv) the exclusion of option premiums paid or received in current period related to future period production; and (v) the exclusion of the impact of current period cash settlements for early-terminated derivatives originally designated to settle against future period production.

² Adjusted net income includes the adjusted net income attributable to noncontrolling interest for all periods presented.

Reconciliation of GAAP "Net income (loss)" to Non-GAAP "Adjusted EBITDAX" - Actual

Adjusted EBITDAX represents net income (loss) before (gain) loss on extinguishment of debt, interest expense, income taxes, impairments of oil and gas properties, depreciation, depletion and amortization expense and share-based compensation expense, further adjusted to include the net commodity realized settlements of derivatives and exclude the effects of gains and losses on sales of assets, non-cash changes in the fair value of derivatives, and special items including acquisition, integration and strategic transaction costs, and organizational restructuring costs, including severance. We believe this presentation is commonly used by investors and professional research analysts for the valuation, comparison, rating, investment recommendations of companies within the oil and gas exploration and production industry. We use this information for comparative purposes within our industry. Adjusted EBITDAX is not a measure of financial performance under GAAP and should not be considered as a measure of liquidity or as an alternative to net income (loss). Adjusted EBITDAX as defined by Ranger Oil may not be comparable to similarly titled measures used by other companies and should be considered in conjunction with net income (loss) and other measures prepared in accordance with GAAP, such as operating income or cash flows from operating activities. Adjusted EBITDAX should not be considered in isolation or as a substitute for an analysis of Ranger Oil's results as reported under GAAP.

¹ LTM Adjusted EBITDAX pro forma for the Lonestar Acquisition is derived from the historical periods as reported in Lonestar Resources' respective Quarterly Report on Form 10-Q includes the use of the financial information for the third quarter of 2021 derived from its general ledger system and reported on the same basis of accounting as applied for prior reported periods.

² LTM Adjusted EBITDAX pro forma includes the impacts of the acquisitions that closed as of June 30, 2022 to reflect the revenues and direct operating expenses associated with the incremental working interest we acquired in the Ranger-operated producing wells.

³ Realized commodity settlements, net includes, as applicable to the period presented: (i) current period commodity derivative settlements (excluding novated and settled Lonestar derivative contracts); (ii) the impact of option premiums paid or received in prior periods related to current period production; (iii) the impact of prior period cash settlements of early-terminated derivatives originally designated to settle against current period production; (iv) the exclusion of option premiums paid or received in current period related to future period production; and (v) the exclusion of the impact of current period cash settlements for early-terminated derivatives originally designated to settle against future period production.

Reconciliation of GAAP "Operating expenses" to Non-GAAP "Adjusted direct operating expenses and Adjusted direct operating expenses per boe"

Adjusted direct operating expenses and adjusted direct operating expenses per boe are supplemental non-GAAP financial measure that exclude certain non-recurring expenses and non-cash expenses. We believe that the non-GAAP measure of Adjusted total direct operating expense per boe is useful to investors because it provides readers with a meaningful measure of our cost profile and provides for greater comparability period-over-period.

Reconciliation of GAAP "General and administrative expenses" to Non-GAAP "Adjusted cash general and administrative expenses"

Adjusted cash general and administrative expenses is a supplemental non-GAAP financial measure that excludes certain non-recurring expenses and non-cash share-based compensation expense. We believe that the non-GAAP measure of Adjusted cash general and administrative expenses is useful to investors because it provides readers with a meaningful measure of our recurring G&A expense and provides for greater comparability period-over-period.

Definition and Explanation of Adjusted Free Cash Flow

Adjusted Free Cash Flow is a non-GAAP financial measure that management believes illustrates our ability to generate cash flows from our business that are available to be returned to our providers of financing capital. Adjusted Free Cash Flow is defined as net cash provided by operating activities (a GAAP measure), adjusted for: gains (losses) on extinguishment of debt, cash and deposits paid for acquisitions (net of cash acquired), cash paid for capital expenditures, cash proceeds from sales of assets, (discounts) premiums associated with proceeds of debt offerings, assumption (repayments) of acquired and other debt, proceeds

from noncontrolling interests (net of transaction/issuance costs paid), share repurchases, withholding taxes for share-based compensation and debt issuance costs paid. Pro Forma Adjusted Free Cash Flow is defined as Adjusted Free Cash Flow and includes changes to beginning Net debt to incorporate the effects of the Lonestar Acquisition and share repurchases and cash and deposits paid for acquisitions. We believe Adjusted Free Cash Flow is commonly used by investors and professional research analysts for the valuation, comparison, rating, investment recommendations of companies in many industries. Adjusted Free Cash Flow and Pro Forma Adjusted Free Cash Flow should be considered as a supplement to net income as a measure of performance and net cash provided by operating activities as a measure of our liquidity.

¹ Twelve months ended June 30, 2022 includes cash paid for acquisitions, net of cash of \$11.0 million in connection with the Lonestar Acquisition.

² Net debt at the beginning of the period has been adjusted for the net cash effects of the Lonestar Acquisition. See the following table for adjustments to Net debt.

Net Debt

Net debt is a non-GAAP financial measure that is defined as total principal amount of long-term debt, excluding unamortized discount and debt issuance costs, less cash and cash equivalents. Long-term debt excludes non-recourse mortgage debt assumed with the Lonestar Acquisition. The most comparable financial measure to Net debt under GAAP is principal amount of long-term debt. Net debt is used by management as a measure of our financial leverage. Net debt should not be used by investors or others as the sole basis in formulating investment decisions as it does not represent the Company's actual indebtedness.
