Quantum Battery Metals Begins Planning for Exploration at Rabbit Lake

19.01.2024 | Newsfile

Vancouver, January 19, 2024 - Quantum Battery Metals Corp. (CSE: QBAT) (OTC Pink: BRVVF) (FSE: 23B0) ("Quantum" or the "Company") has begun planning for its exploration program at its Rabbit Lake property in Ontario. The Rabbit Lake property is located 14 km southeast of the town of Temagami near the eastern border of Ontario. The approximately 1,040-hectare Rabbit cobalt property comprises 66 claim units. Phase 1 of the Company's exploration program was completed previously and consisted of mineral/rock prospecting and sampling.

Objectives to review for planning:

- Complete compliance of Rabbit Lake Property work commitments.
- Continue initial grab and soil sampling programs on the property further showing high grade Cobalt.
- Possible Induced Polarization (IP) survey over a large part of the Rabbit Lake property. The survey is designed to reveal targets that can be tested for high grades and potential Possible drill campaign(s).
- Initiating a drilling campaign based on findings.

Cobalt is the primary metal used in the production of EV batteries and demand is about to soar for this essential component of electric vehicles^[1]. Canada recently passed a mandate that all sales of passenger cars, SUVs, crossovers, and light trucks be hybrids, electric or hydrogen-powered by 2035. Taking all new gas-powered cars off the market, and Canada isn't the only country moving forward as others in Europe have pushed for similar mandates.

This demand for electric batteries will see a sharp incline for Canadian produced critical minerals as companies produce batteries for local and international use^[2]. The federal government is pouring billions in the production facilities in order not to be left behind and keep Canada's economy and mining sector highly competitive. Quantum sees itself as a potential supplier for these batteries in the future.

Quantum's properties are located near the prolific district of Cobalt, Ont., known for its high grades, ethical supply, and historic mining.

Forward-Looking Information

This news release includes certain statements that may be deemed "forward-looking statements." All statements in this release, other than statements of historical facts, that address events or developments that Quantum Battery Metals Corp. (the "Company") expects to occur, are forward-looking statements.

27.04.2025 Seite 1/2

Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, and continued availability of capital and financing, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by applicable securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.
