

Green Bridge Metals Applauds Canada's Potential Federal Legislative Changes to Streamline Environmental Regulations

14.03.2024 | [vom Unternehmen](#)

Vancouver, March 14, 2024 – [Green Bridge Metals Corporation](#) (CNSX: GRBM, OTCQB: GBMCF, FWB: J48, WKN: A3EW4S) ("Green Bridge" or the "Company") is pleased to announce its support for Canada's possible federal budget inclusion of legislative changes aimed at streamlining environmental regulations for large resource projects. In a recent interview at the Prospectors and Developers Association of Canada (PDAC) annual mining conference in Toronto, Canada, Canada's Minister of Energy and Natural Resources Jonathan Wilkinson highlighted that, in response to last year's Supreme Court of Canada ruling, possible legislative modifications may be included in the forthcoming federal budget scheduled for presentation on April 16, 2024.[1]

This decision seeks to refine the 2019 Impact Assessment Act, thereby providing a clearer framework for the jurisdictional division between federal and provincial governments over resource projects. Such changes promise to enhance the efficiency of environmental assessments and regulatory processes for significant mining, oil and gas projects, and pipelines. 1

Green Bridge views these anticipated legislative adjustments as a crucial step towards restoring certainty and expediting the environmental assessment process for substantial resource endeavours. As a company deeply engaged in mining and exploration activities, the introduction of a more integrated and transparent federal-provincial environmental assessment system will significantly benefit companies like Green Bridge's and their operations. This reform is expected to streamline the approval process, thereby reducing delays and fostering a more conducive environment for the development of critical resource projects. 1 The Company remains committed to environmental stewardship and looks forward to the positive impact these legislative changes may have on the industry's sustainability and growth.

The Company also announces that it has engaged with MIC Market Information & Content Publishing ("MIC"), an independent entity, for a range of online marketing services encompassing campaign creation, production of marketing materials, as well as research and analytics (the "Services"). In exchange for these Services, the Company will remunerate EUR 250,000 for a six-month period, or until the budget is exhausted. Either party reserves the right to terminate the contract with a 30-day notice prior to the end of the month.

The compensation provided to MIC does not involve any securities of the company. Besides this specific arrangement, there are no other affiliations between the Company and MIC, including with Ms. Christina Hammer, the CEO of MIC. MIC's business address is located at Gerhart-Hauptmann-Straße 49B, 51379 Leverkusen, Germany, email at contact@micpublishing.de, telephone number at +49 2171-7766628, and website is www.micpublishing.de.

About Green Bridge Metals

Green Bridge Metals Corporation (formerly Mich Resources Ltd.) is a Canadian based exploration company focused on acquiring 'battery metal' rich mineral assets and the development of the South Contact Zone (the "Property") along the basal contact of the Duluth Intrusion, north of Duluth, Minnesota. The South Contact Zone contains bulk-tonnage copper-nickel and titanium-vanadium in ilmenite hosted in ultramafic to oxide ultramafic intrusions. The Property has exploration targets for bulk-tonnage Ni mineralization, high grade Ni-Cu-PGE magmatic sulfide mineralization and titanium.
