25.07.2024 | [GlobeNewswire](#)

VANCOUVER, July 25, 2024 - [Almadex Minerals Ltd.](#) ("Almadex" or the "Company") (TSX-V: "DEX") is pleased to announce that diamond drilling has commenced at the Company's Paradise project in Nevada, USA.

The current drill program has been designed to test lithocap targets for potential underlying copper-gold porphyry mineralisation. As described in its news release of February 27th, 2024, Almadex defined a porphyry copper-gold target at Paradise through mapping and soil geochemistry. The company has now completed the first hole and has started a second.

Morgan J Poliquin, President, CEO and a Director of the Company commented, "Testing the lithocap target at Paradise is a milestone for the Company. We hope this initial program will provide a much better understanding of this system and a vector to a porphyry centre within the large area of lithocap alteration our work has defined. We look forward to providing results once received."
