

CopAur Minerals Consolidates 100% Interest in Kinsley Mountain Gold Project

13.08.2024 | [Newsfile](#)

Vancouver, August 12, 2024 - [CopAur Minerals Inc.](#) (TSXV: CPAU) (OTCQX: COPAF) ("CopAur" or the "Company") is pleased to announce that it has completed its previously announced (see news release disseminated July 8, 2024) acquisition from [Nevada Sunrise Metals Corp.](#) ("Nevada Sunrise") of Nevada Sunrise's 18.74% ownership interest in Kinsley Gold LLC ("LLC"), the joint venture vehicle that holds rights to the Kinsley Mountain Gold Project in Nevada ("Kinsley Project"). The Company now owns 100% of the Kinsley Project, a gold exploration project in Elko County, Nevada. The Kinsley Project comprises 513 unpatented lode claims on U.S. Bureau of Land Management land plus 6 leased patents totaling 4,213 hectares (10,410 acres), and hosts a past-producing mine with an extensive exploration database and numerous, untested gold targets. The leased claims are subject to a 3% net smelter returns royalty on production.

Under the terms of a membership purchase agreement CopAur acquired Nevada Sunrise's 18.74% ownership interest in the LLC in consideration of the payment of CDN\$475,000 and the issuance of 1,000,000 common shares of CopAur ("Consideration Shares") to Nevada Sunrise. The Consideration Shares are subject to a four-month statutory hold period (the "Statutory Hold Period") and voluntary hold periods for an additional nine month period. The first 250,000 Consideration Shares will be released on expiry of the Statutory Hold Period and the remaining shares will be released in equal tranches every three months following the first release.

Chief executive officer Jeremy Yaseniuk stated: "We are pleased to have completed this transaction to acquire 100% ownership of the LLC, which provides us with full control over the Kinsley Project and the ability to concentrate our efforts on further advancing this exciting project. The Kinsley Project has both oxide and sulphide gold resources. Recent drilling by the Company has yielded multiple near-surface oxide intercepts at the Main Pit North target and high-grade sulphide gold mineralization at the Western Flank (news releases Oct. 4, 2023 and Nov. 10, 2023)."

The Kinsley Project hosts a National Instrument 43-101 mineral resource that CopAur is working to upgrade and expand. The Kinsley Project is a historical past producer that yielded 138,000 ounces of near-surface open-pit gold between 1995 and 1999, when mining was suspended.

A technical report on the Kinsley Project titled "Technical Report of the Kinsley Project, Elko and White Pine Counties, Nevada, U.S.A.", dated June 21, 2021, with an effective date of May 5, 2021, prepared by Michael M. Gustin and Gary L. Simmons, is available for review under [New Placer Dome Gold Corp.](#)'s issuer profile on SEDAR+.

About CopAur

CopAur is an exploration company focused on developing projects within the emerging, mineral-rich mining regions of Nevada. The Company is backed by a dynamic and experienced team of resource professionals advancing its projects in Nevada with the flagship project being Kinsley Mountain gold property, a Carlin-style project located 90 kilometres south of the Long Canyon mine (currently in production under the Newmont/Barrick joint venture, Nevada Gold Mines).
