

Desert Mountain Energy Corp. Announces Commercial Production Of Helium

16.09.2024 | [CNW](#)

VANCOUVER, Sept. 16, 2024 - [Desert Mountain Energy Corp.](#) (the "Company") (TSXV: DME) (OTC: DMEHF) (Frankfurt: QM01) From the President of the Company. Desert Mountain Energy Corp. is pleased to announce that the separation of commercial volumes of helium from a complex natural gas stream has been achieved. The processing plant has been recirculating and enriching helium with the end product going into an end user's tube trailer. The facility has been in commercial operation following the resolution of numerous issues by the DME team during the start-up phase.

Current production revenue is now expected to cover the overall corporate G&A but will not be reflected in the September 30, 2024, audited year- end financials. The Company anticipates a gradual rise in sales volumes and revenue, with a current emphasis on well workovers and reducing the overall small percentage of produced water.

During the facility's relocation from Arizona, an AI component was integrated. Currently, the AI is undergoing training through data collection while commercial processing remains ongoing. Data points are essential for the system to learn and function effectively as more wells are brought online. Each well possesses distinct chemical compositions that the plant must adapt to. The plant is nearing autonomy, requiring minimal human intervention for operation.

The geological team continues to review downhole data to determine the most viable wells for increased helium production. They are also examining regional data to enhance the understanding of geological controls and pinpoint locations with the potential for higher helium grades. Certain wells are showing increased levels of hydrogen, prompting a need for further investigation to determine the underlying causes of these occurrences.

ABOUT DESERT MOUNTAIN ENERGY

Desert Mountain Energy Corp. is a publicly traded resource company primarily focused on the exploration, development and production of helium, hydrogen, natural gas and condensate. The Company is focused on helium extraction from different raw gas sources in an environmental and economic manner supplying elements deemed critical to the renewable energy and high technology industries.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. The statements made in this press release may contain certain forward-looking statements that involve a number of risks and uncertainties. Actual events or results may differ from the Company's expectations.

Cautionary Note Regarding Forward-Looking Statements

This news release contains "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation. Such forward looking statements and information herein include but are not limited to statements regarding the Company's anticipated performance in the future the planned exploration activities, receipt of positive results from drilling, the completion of further drilling and exploration work, and

the timing and results of various activities.

Forward-looking statements or information involve known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company and its operations to be materially different from those expressed or implied by such statements. Such factors include, among others, changes in national and local governments, legislation, taxation, controls, regulations and political or economic developments in Canada and the United States; financial risks due to helium prices, operating or technical difficulties in exploration and development activities; risks and hazards and the speculative nature of resource exploration and related development; risks in obtaining necessary licenses and permits, and challenges to the Company's title to properties.

Forward-looking statements are based on assumptions management believes to be reasonable, including but not limited to the continued operation of the Company's exploration operations, no material adverse change in the market price of commodities, and such other assumptions and factors as set out herein. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or information, there may be other factors that cause results to be materially different from those anticipated, described, estimated, assessed or intended. There can be no assurance that any forward-looking statements or information will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements or information. Accordingly, readers should not place undue reliance on forward-looking statements or information. The Company does not intend to, and nor does not assume any obligation to update such forward-looking statements or information, other than as required by applicable law.
