

Canagold Completes Resource Expansion Drilling Program at New Polaris with Additional Strong Mineralization Intercepts

18.09.2024 | [Business Wire](#)

[Canagold Resources Ltd.](#) ("Canagold" or the "Company") (TSX: CCM, OTC-QB: CRCUF, Frankfurt: CANA) announces sample assay results from an additional 2 drill holes from the resource expansion drill program targeting the North Zone at its 100% owned New Polaris Gold project located in northwestern British Columbia, 100 kilometers (km) south of Atlin and 60 km northeast of Juneau, Alaska.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20240918355579/en/>

Details of the holes are shown in Table 1.

Highlights

- 10.8 grams per tonne ("gpt") gold ("Au") over 4.3 m from 176.4 m down hole in Hole NP24-34
 - Including 15.5 gpt Au over 2.0 m from 177.5 m
- 10.4 gpt Au over 3.6 m from 166.8 m down hole in Hole NP24-34
 - Including 12.3 gpt Au over 1.3 m from 166.8 m
- 14.1 gpt Au over 1.1 m from 202.7 m down hole in Hole NP24-33A
- 10.4 gpt Au over 1.2 m from 252.3 m down hole in Hole NP24-33A

Catalin Kilofliski, CEO of Canagold, expressed his satisfaction with the results from this year's resource expansion drilling program. "With all assay results now received, we are actively modeling the new mineralization to assess the potential for expanding the already identified high-grade resources* with additional shallow high-grade resources at the New Polaris Project," he said.

*The New Polaris resource is contained within an Updated Resource Report which was prepared by Moose Mountain Technical Services in the format prescribed by NI43-101 Standards of Disclosure for Mineral Projects, and filed on Sedar June 30,2023.

Hole ID	UTM E UTM N		Elev (m)	Azi (deg)	Dip (deg)	Depth (m)
	NAD83	NAD83				
NP24-33A	579156	6507897	172	261	-436	290
NP24-34	579156	6507897	172	261	-24	250

Table 1: Drill Hole Data

*Drill intercepts shown are core length as insufficient drilling and modelling has taken place to determine the true dip and strike orientation of the veins being intercepted.

Multiple veins are being intercepted in this area of the deposit as shown in Figure 1.

The drilling program has now been completed with 10,300 meters being drilled in 34 holes and modeling of

the results are in progress. The drilling has intercepted five separate zones of mineralization in this area.

Drill Core Sampling and Quality Assurance - Quality Control Program

Drill core is geologically logged to identify the gold mineralized zones that are allocated unique sample number tickets and marked for cutting using a purpose-built diamond blade rock saw. Half core samples are collected in labelled bags and the other half remains in the original core box stored on site. Quality control (QC) samples including certified reference material standards, blanks and duplicates are inserted into the sample sequence at intervals of one in ten on a rotating basis to monitor laboratory performance and provide quality assurance (QA) of the assay results. Several sample bags are transported together in rice bags with unique numbered security tags attached and labelled with Company and lab contact information to ensure sample security and chain of custody during shipment to the lab.

Diamond drill core samples were prepared at MSA Labs' Preparation Laboratory in Terrace, BC and assayed at MSA Labs' Geochemical Laboratory in Langley, BC. Analytical accuracy and precision are monitored by the submission of blanks, certified standards and duplicate samples inserted at regular intervals into the sample stream by Canagold personnel. MSA Laboratories quality system complies with the requirements for the International Standards ISO 17025 and ISO 9001.

Some diamond drill core samples were submitted to the ALS Geochemistry Lab in Whitehorse, YT for preparation and assaying. Analytical accuracy and precision are monitored by the submission of blanks, certified standards and duplicate samples inserted at regular intervals into the sample stream by Canagold personnel. ALS Canada Ltd. is accredited by the Standards Council of Canada and is an ISO/IEC 9001:2015 and 17025:2017 certified analytical laboratory in North America.

MSA Labs and ALS Labs are independent of the Company.

Qualified Person

Garry Biles, P.Eng, President & COO for [CanaGold Resources Ltd.](#), is the Qualified Person who reviewed and approved the contents of this news release.

About Canagold

Canagold Resources Ltd. is an advanced development company dedicated to advancing the New Polaris Project through feasibility, permitting, and production stages. Additionally, Canagold aims to expand its asset base by acquiring advanced projects, positioning itself as a leading project developer. With a team of technical experts, the Company is poised to unlock substantial value for its shareholders.

Cautionary Note Regarding Forward-Looking Statements

This news release contains "forward-looking statements" within the meaning of the United States private securities litigation reform act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation. Statements contained in this news release that are not historical facts are forward-looking information that involves known and unknown risks and uncertainties. Forward-looking statements in this news release include, but are not limited to, statements with respect to the future performance of Canagold, and the Company's plans and exploration programs for its mineral properties, including the timing of such plans and programs. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "has proven", "expects" or "does not expect", "is expected",

"potential", "appears", "budget", "scheduled", "estimates", "forecasts", "at least", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "should", "might" or "will be taken", "occur" or "be achieved".

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and other factors include, among others risks related to the uncertainties inherent in the estimation of mineral resources; commodity prices; changes in general economic conditions; market sentiment; currency exchange rates; the Company's ability to continue as a going concern; the Company's ability to raise funds through equity financings; risks inherent in mineral exploration; risks related to operations in foreign countries; future prices of metals; failure of equipment or processes to operate as anticipated; accidents, labor disputes and other risks of the mining industry; delays in obtaining governmental approvals; government regulation of mining operations; environmental risks; title disputes or claims; limitations on insurance coverage and the timing and possible outcome of litigation. Although the Company has attempted to identify important factors that could affect the Company and may cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, do not place undue reliance on forward-looking statements. All statements are made as of the date of this news release and the Company is under no obligation to update or alter any forward-looking statements except as required under applicable securities laws.
