

Yara reports strong operational performance and cost improvements

07.02.2025 | [GlobeNewswire](#)

Yara reports fourth quarter EBITDA excluding special items¹ of USD 519 million compared with USD 576 million in fourth quarter 2023. Fourth quarter 2024 results were impacted by several non-cash effects, including negative special items of USD 170 million in operating income and a currency loss of USD 260 million. This resulted in a negative net income in fourth quarter of USD 290 million, compared with positive USD 246 million a year earlier.

Fourth quarter 2024 highlights:

- Record production² and safety performance, and delivering on cost improvements
- EBITDA¹ of 519 MUSD with lower prices, but improving markets into 2025
- NOK 5 per share annual dividend proposed
- Top priority is increasing free cash flow³ and shareholder returns

"Yara's operational performance this quarter is strong, with record-high production and safety performance. This marks a significant milestone in our continuous work to improve safety and resilience in Yara. We're also progressing well on our cost and capex reduction program, with a USD 90 million reduction achieved in 2024," said Svein Tore Holsether, President and Chief Executive Officer.

Net income for fourth quarter 2024 is impacted by several non-cash effects, including currency translation loss, impairments and pension buy-out, totaling to USD 430 million before tax. While a strengthening of the US dollar triggers a currency translation loss on US debt positions, a stronger US dollar is fundamentally positive for Yara's business, as nitrogen margins are largely USD-driven. Going forward, the combination of strict capital discipline and a tightening nitrogen market, is set to strengthen Yara's financial position, driving increased free cash flow and sustainable profitability. This in turn will enable funding of value-accretive growth and increased shareholder returns.

"Yara's key priority is to create value for its shareholders, and our capital allocation strategy is driven solely by the goal of maximizing long-term value. By prioritizing our core business and focusing on higher-return operations, we will ensure a fit-for-future Yara," said Holsether.

About Yara

Yara's mission is to responsibly feed the world and protect the planet. We pursue a strategy of sustainable value growth through reducing emissions from crop nutrition production and developing low-emission energy solutions. Yara's ambition is focused on growing a nature-positive food future that creates value for our customers, shareholders and society at large and delivers a more sustainable food value chain.

To drive the green shift in fertilizer production, shipping, and other energy intensive industries, Yara will produce ammonia with significantly lower emissions. We provide digital tools for precision farming and work closely with partners at all levels of the food value chain to share knowledge and promote more efficient and sustainable solutions.

Founded in 1905 to solve the emerging famine in Europe, Yara has established a unique position as the industry's only global crop nutrition company. With 18,000 employees and operations in more than 60 countries, sustainability is an integral part of our business model. In 2024, Yara reported revenues of USD 13.9 billion.
