Canadian Critical Minerals Generates USD\$79,000 in Revenue from Bull River Mine

28.04.2025 | Newsfile

Calgary, April 28, 2025 - Canadian Critical Minerals Inc. (TSXV: CCMI) (OTCQB: RIINF) ("CCMI" or the "Company") is pleased to report revenues for the Company from the sale of stockpiled copper, gold and silver mineralized material at the Bull River Mine ("BRM") project near Cranbrook, BC. During the month of March 2025, the Company trucked 254 dry metric tonnes ("dmt") of sorted mineralized material to New Afton and the Company received a provisional payment of approximately USD\$79,000 for the March 2025 shipments. The mineralized material sent to New Afton graded 3.14% Cu, 0.82 g/t Au and 25.2 g/t Ag.

The Company only sent six trucks of pre-concentrated mineralized material to New Afton in March 2025 due to the imposition of spring road restrictions on unpaved off roads in southern British Columbia in early March. During road restrictions, the carrier is restricted to 70% of the total weight of the tractor trailer and truck box which effectively reduces the pay load to 50% of normal. In lieu of hauling mineralized material during road restrictions, the Company elected to continue sorting material at the mine and plans to resume trucking in late April to early May 2025 once road restrictions have been limited.

Copper grade for March 2025 was lower than planned due to operational issues with the sensors on the x-ray transmissive ore sorter. Operational issues with the sorter have been resolved and the sorter is working well. Effectively less copper reported to the high-grade stream in early March and rejects from the sorter had higher copper content than in previous months. All rejects from sorting have sufficiently high enough grade that they can be processed at the BRM once the mill has been re-permitted to operate.
